

```
// Function to remove duplicates from sorted linked list.
Node removeDuplicates(Node head) {
    if (head == null || head.next == null) {
        return head;
    }
    Node curr = head;
    while (curr != null && curr.next != null) {
        Node next = curr.next;
        if (curr.data == next.data) {
            // remove next element
            curr.next = next.next;
            next.next = null;
            continue;
        }
        curr = curr.next;
    }
    return head;
}
```
