

```
// Function to connect nodes at same level in Binary Tree.
// Node{int data, Node left, Node right, Node nextRight}
// nextRight should point next right for each node.
// Then each level will make a linked list.
public void connect(Node root){
    Queue<Node> queue = new LinkedList<>();
    queue.add(root);
    queue.add(null);
    while(!queue.isEmpty()){
        Node u = queue.remove();
        if(u != null){
            Node next = queue.peek();
            u.nextRight = next;
            if(u.left != null){
                queue.add(u.left);
            }
            if(u.right != null){
                queue.add(u.right);
            }
            continue;
        }
        if(!queue.isEmpty()){
            queue.add(null);
        }
    }
}
```
