```java
// Function to convert a binary tree into its mirror tree.
void mirror(Node node) {
    if (node == null) {
        return;
    }
    Node left = node.left;
    Node right = node.right;
    node.left = right;
    node.right = left;
    mirror(node.left);
    mirror(node.right);
}
```
