```java
// Function to return the level order traversal of a Binary Tree.
static ArrayList<Integer> levelOrderBinaryTree(Node node) {
    ArrayList<Integer> list = new ArrayList<>();
    if (node == null) {
        return list;
    }
    Queue<Node> queue = new LinkedList<>();
    queue.add(node);
    while (!queue.isEmpty()) {
        Node u = queue.remove();
        list.add(u.data);
        if (u.left != null) {
            queue.add(u.left);
        }
        if (u.right != null) {
            queue.add(u.right);
        }
    }
    return list;
}
```
